

## **COVID 19 - Additional Guidance For Litter Pick Volunteers**

We understand that many of our regular volunteers are keen to get back to their usual routes and areas but want to do so safely. Our standard guidance for volunteers gives comprehensive details of how to stay safe; please continue to use this along with the additional information beneath.

- Wear gloves (disposable by preference) during the litter pick at all times
- Wash hands thoroughly with soap and water for 20 seconds before and after you litter pick
- Use hand sanitiser before and after you litter pick
- Only pick up items with a litter pick stick
- Clean and disinfect regularly touched objects, such as litter pickers, using your regular cleaning products
- Stay at least two meters (about three steps) away from other people whenever possible
- Use doubled up bags for items such as masks, tissues, gloves which should not be disposed of with the normal litter but segregated for a minimum of 72 hours before placing with 'normal' waste.
