

Development Proposals for the Play Park (phase I – III)

Phase 1 was development of a Younger Children's Area

To include a large centre piece, with several activity areas, such as a Large Wooden 'ship' or 'fort' with a slide, log climber, rock climber, log ramp etc.

Also separate items such as a Cradle Swing with 2 cradle seats, a Horse Safari Springer and a Two way Shark Springer.

Nearby seating e.g. a picnic combined table and seats

It was not thought necessary to enclose this area in fencing, but we welcome your views.

Phase 2: Zip Wire

A timber 20m Zip Wire with 2m Platform

Phase 3: Adults and older children's Outdoor Gym Area

This would include several stations such as a Double Slalom Skier, a Double Health Walker, a Double Squat Push, an Arm and Pedal Bicycle, and a Combination Pull Down Challenger & Power Push

The existing Play equipment will be refurbished. The grounds and wooded area will be tidied up and developed, hopefully with the help of local volunteers.

There could be later additions such as a Sunken Mini Trampoline, as and when further funding becomes available.
